

Saving Lives with Award-Winning Defibtech Technology...

Advantages of Defibtech Defibrillators

In a crisis, there's no time to read an instruction manual. Automated External Defibrillators (AEDs) must be simple, clear and straight forward. *Defibtech* AEDs are built to the exacting standards needed for emergency personnel, yet are designed for the speed and simplicity required for use by non-medical and often untrained individuals. *Defibtech's* lightweight device and sure-grip rubberized handle make it easy to pull the AED off the wall and transport to a patient. A calm voice guides the responder through each step, reinforced by a text display with lights to show the progress. Electrode pads are tucked into a back pocket, ready to apply, and large, clearly illuminated "Power On" and "Shock" buttons help even the most nervous fingers hit their mark.

Simple, reliable and state-of-the-art:

- High ratings for dust and water protection
- 8 year warranty on all models
- Longest battery life on the market (7 years for Lifeline semi and fully auto)
- The *Defibtech Lifeline VIEW AED* is the first and only AED with a full-colour interactive display that shows step-by-step videos for performing CPR, rescue breathing, and external defibrillation.
- Manufactured in the US and award winning brand
- All models are FDA approved which means they have gone through the most stringent quality testing
- 24 hour technical support and swap outs if you experience an unlikely issue
- Supported by the largest Australian independent medical device company with over 650 employees
- Drop proof to 1.2m
- Crush proof to 450kg (view unit)
- Simple to use with minimal buttons
- Pre-connected pads and no lids which enhances the simplicity
- Only 1.4kg and 2kg in weight
- Software driven which means future upgrades can be done in the field with a data card
